Gastric bypass is surgery that helps us lose weight by changing how our stomach and small intestine handle the food we eat. After the surgery, our stomach will be smaller. We feel full with less food. The food we eat will no longer go into some parts of our stomach and small intestine that absorb food. Because of this, our body will not get all of the calories from the food we eat. This is indeed worth purchase as it contains 100+ Quick recipes for stage 1 and 2.
