# Planting And Maintaining A Tree Collection

## Synopsis

Trees capture the imagination of the stoniest hearted, and enjoyment of them extends way beyond a core interest in plants and gardening. They represent permanence and longevity and have become symbolic of the health of our planet. People plant trees to mark events of public and private importance, and parks and arboretums attract thousands of visitors each year to witness the annual spectacles of spring and fall. Or simply to enjoy the trees. In this book, Toomer explores the fascinating subject of collecting trees from a historical, practical, and philosophical standpoint and in doing so illuminates the very special relationship that exists between humans and trees. What inspires so many of us to become tree collectors? How do we choose what to collect, and what makes us narrow it down to witch hazels or magnolias? And he looks at the different motivations behind tree collections ranging from aesthetic criteria to collections planted for education value or for scientific research. For those interested in planting a handful of trees, for armchair tree collectors, for those who collect trees on a large scale in private and public gardens, cemeteries, urban landscapes, schools, and, of course, arboretums this is a hugely inspiring, well-structured, comprehensive treatment of the subject that provokes thought and provides practical advice on everything from budgets and maintenance to plant selection, labeling, and public safety.

## Book Information

Hardcover: 232 pages

Publisher: Timber Press; 1st edition (April 21, 2010)

Language: English

ISBN-10: 0881929301

ISBN-13: 978-0881929300

Product Dimensions: 6.3 x 0.9 x 9.3 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 1 customer review

Best Sellers Rank: #2,641,343 in Books (See Top 100 in Books) #70 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > By Technique > Topiary #544 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Trees

## Customer Reviews

“A helpful orientation tool.” • Choice

Simon Toomer is Director of the National Arboretum, Westonbirt, where he oversees management and development of the world-class collection of over 17,000 trees and shrubs. He has worked in forestry, woodland management, and arboriculture throughout his life in both the private and public sectors. He holds a master's degree in forestry and the Royal Forestry Society's Professional Diploma in arboriculture, and has traveled widely in pursuit of trees. He is the author of *Trees for the Small Garden*.

If you are interested in establishing a public tree collection/arbotetum this is the book for you. It covers everything from site selection to labelling and how to engage visitors. I suspect this is the only book to cover the details of starting an arboretum. I have only given it three stars not because any of the information is wrong, rather because it is written in rather a dry tone and does not convey the joy of tree collecting
