# The New Indian Slow Cooker: Recipes For Curries, Dals, Chutneys, Masalas, Biryani, And More

## Synopsis

The newest book in Ten Speed's best-selling slow cooker series, featuring more than 60 fix-it-and-forget-it recipes for Indian favorites. The rich and complex flavors of classic Indian dishes like Lamb Biryani, Palak Paneer, and chicken in a creamy tomato-butter sauce can take hours to develop through such techniques as extended braising and low simmering. In *The New Indian Slow Cooker*, veteran cooking teacher and chef Neela Paniz revolutionizes the long, slow approach to making Indian cuisine by rethinking its traditional recipes for the slow cooker. She showcases the best regional curries, dals made with lentils and beans, vegetable and rice sides, as well as key accompaniments like chutneys, flatbreads, raita, and fresh Indian cheese. Using this fix-it-and-forget-it approach, you can produce complete and authentic Indian meals that taste like they came from Mumbai, New Delhi, and Bangalore, or your favorite Indian restaurant. Featuring both classic and innovative recipes such as Pork Vindaloo, Kashmiri Potato Curry, Date and Tamarind Chutney, and Curried Chickpeas, these full-flavor, no-fuss dishes are perfect for busy cooks any day of the week.

## Customer Reviews

NEELA PANIZ grew up in Bombay, India. After moving to the US, Paniz opened Chutney's Indian take-out and the hugely successful Bombay Cafe in Los Angeles, and a contemporary Indian restaurant, Neela's, in Napa. She is also the author of *The Bombay Cafe*, which put her on the national map as one of the leading voices of contemporary Indian cuisine. Since selling her restaurants, Paniz has appeared as the winning contestant on *Chopped*, taught cooking classes,

provided recipes for many magazine articles, and been a presenter at The Culinary Institute of America.

Introduction When I was asked if I would be interested in writing a book on Indian slow cooking, my immediate thought was that it was not possible to achieve in a slow cooker what one did in a saucepan. Indian food is based on slowly built combinations of spices and aromatics—patiently brown the onions, fry the spices, roast the vegetables, tending to the pot to keep all moving along without sticking or burning. The slow cooker would be a new route to a crucial destination: the vibrant, deeply satisfying flavors of traditional curries, dals, chutneys, and more. I didn't know if it could be done. My memories of Chandan, the cook my mother employed for over forty years, helped me decide to take the challenge. Chandan treated us to the most amazing meals full of vibrant flavors. He would buy fresh produce and meats from the market every day, seeking out the best quality and value. You could hear him, busy in the kitchen, butchering or grinding the meat, cleaning the poultry and seafood, and prepping the vegetables. And then there would be the sound of the spices being ground in a stone grinder. The bottom slab of stone had been pounded with small depressions to create a rough surface; the top, smaller stone resembled a thin brick. Chandan would sit on his haunches and grind dry spices between the stones, or make a paste of spices with ginger, garlic, and chiles. In the mid-1970s, on one of my visits home to India, I bought my mother a food processor, and Chandan could not have been more delighted to have this modern method of grinding his spices. Of course, it would never be quite the same as the stone grinder, but it saved his back. As time went on, more modern conveniences made their way into my mother's kitchen. When Chandan retired and Prem Singh took over the duties of the kitchen, I rarely saw the old pathar (stone) come out of its hiding hole. He was a modern cook, using the food processor, spice grinder, juicer, blender, and pressure cooker. I wager he would have made great use of a slow cooker. I soon realized that since Indian food is slow cooking, the slow cooker makes sense. Dals are perfect in a slow cooker, especially those that need long cooking to break down into a creamy consistency. However, Indian recipes do require some additional steps to achieve the maximum flavor and stay true to the dish. We use many whole spices or seeds that need to be popped in hot oil or ghee. Meats, poultry, seafood, and some vegetables are stewed slowly in sauces, or masalas, which are in turn created by roasting spices combined with fresh aromatic ingredients such as ginger, garlic, onions, tomatoes, and coconut milk. For example, the base of many curries—the masala—starts with onions cooked to a deep, dark golden brown so that they may dissolve smoothly into the dish. I was visiting with my family in India

during the latter half of my research and recipe testing. I had one slow cooker shipped from the United States and, with much difficulty, located another in a store (as they said, “No one in India uses a slow cooker.”). We borrowed a smaller one from a friend, for testing the chutneys; hers had sat on the top shelf of her kitchen, practically unused. It was interesting to get the reactions of not only the family, who relished the dishes as they came out of the slow cookers, but also of the kitchen help, who found it fascinating that they could prep and then set the dish in the slow cooker on the counter and not have to worry about it again. There were times when we recognized that some of the textures differed, due to the lack of constant attention, but as a rule we were all awed by the flavors it produced—especially when the biryanis came out picture perfect. My sister’s cook, Gopi, actually created the recipe for Pumpkin with Fennel and Tamarind Chutney on page 95; due to its deliciousness, and to his delight with the ease of its preparation, this dish was a winner. Though there are many Indian cookbooks in the market, home cooks are often still wary of trying their hand at Indian food. Among other things, the standard Indian meal requires so many preparations to complete the plate: one must have either chawal (rice) or chapattis (flat breads), along with a curry (whether nonvegetarian or vegetarian), often a dal (stewed lentils or other legumes), and a raita (yogurt relish) or chutney as an accompaniment. In this book, I have concentrated on offering you a variety of Indian regional curries, dals, chutneys, and vegetable side dishes that can work as sides for the curries; there are also some soups and rice dishes that can serve as the center of a meal. The assumption is that you are not going to have more than one slow cooker preparing varieties of dishes for a single meal, so a great many of these dishes can stand as the main dish in a meal, along with plain rice or chapatti (I have included recipes for these and other basics and accompaniments in the first chapter) and a relish or two. Note: I used a 6-quart slow cooker for testing almost all the recipes included in this book and have noted where the recipe can be halved and prepared in a smaller, 3½-2-quart slow cooker.

-----Chicken Soup with Rice, Spinach, and Tomatoes

murghi shorba One of the more popular dishes we served at the Bombay Cafeteria was murghi shorba. I wanted to offer a soup beyond lentils, so using the basic method of another popular dish, Sautéed Chicken with Green Mango Powder (page 40), I came up with an Indian version of chicken and rice soup. Like any good chicken soup, it is a wonderful comfort for those ailing with a cold—and the addition of chiles certainly clears your sinuses! If you are looking to make a stock without the flavors of the whole spices, just leave them out. If using this method for the chicken stock required in the Mulligatawny Soup recipe on page 41, do not add the ginger, chiles, cardamom, cassia, or cloves.

Stock 1 (4-to 4½-2-pound) chicken, skinned

and cut up (see page 21) 10 cups water 1 large yellow onion, cut into 6 pieces 8 cloves garlic, coarsely chopped 1 (2-inch) piece fresh ginger, peeled and coarsely chopped 3 serrano chiles, with seeds, cut into 3 pieces each 1 carrot, peeled and cut into 1-inch rounds 1 tomato, quartered 4 whole black cardamom pods 1 (2-inch) piece cassia, broken in half 8 cloves 8 to 10 whole black peppercorns 11Â¢â•â 2 teaspoons salt 1 cup hot cooked rice 1 large tomato, seeded and diced small 10 to 12 large spinach leaves, julienned 1Â¢â•â 4 cup chopped cilantro, for garnish 1 serrano chile, minced, for garnish (optional)Â ª 1 lemon, cut into 8 wedges, for garnish Before prepping the ingredients, turn the slow cooker on to the high setting for 15 minutes, until the insert is warmed through. To make the stock, add the backbone and wing tips of the cut up chicken to the heated slow cooker along with the water, onion, garlic, ginger, chiles, carrot, tomato, cardamom, cassia, cloves, peppercorns, and salt. Turn the cooker to low and cook for 4 hours. Add the rest of the chicken pieces, turn the cooker to high, and continue to cook for another 2 hours. Transfer the pieces of chicken to a platter. Strain the stock and set aside in a saucepan; keep hot on the stovetop until ready to serve. Shred enough chicken to make 11Â¢â•â 2 cups; reserve the rest for another use, such as SautÃƒÂ©ed Chicken with Green Mango Powder (page 40). Prepare 8 soup bowls with equal amounts of the rice, tomato, spinach, and shredded chicken. Pour hot stock into the bowls, garnish with cilantro, minced serrano chile, and lemon wedges, and serve. Â Note To cook chicken for SautÃƒÂ©ed Chicken with Green Mango Powder (page 40), increase the number of chickens to two, weighing about 3 pounds each, skinned and cut into 6 pieces each. Reserve the resulting stock for another use.

I love Indian food, but, beyond the basic curry, haven't explored preparing my own at home much before, so I was excited to receive a copy of *The New Indian Slow Cooker*. Especially since I own three slow cookers, and would rather give up my stove top than my slow cookers! However, I was disappointed by the actual number of slow cooker recipes in the book. And many of the ones that are technically cooked in the slow cooker, require precooking on the stove top, etc. beforehand. That being said, it is a gorgeous cookbook, with photos of many of the recipes, and features a wide variety of common Indian foods such as yogurt, Naan, butter chicken, as well as some more obscure recipes. I love the dictionary of ingredients, spices, etc. and found it to be very helpful. If the cookbook had a different title, my expectations wouldn't have been a "slow cooker cookbook" and I probably would have rated the cookbook higher.

*The New Indian Slow Cooker* was not what I expected in a slow cooker cook book. When I think of

slow cooker recipes, it's something that I can throw together quickly in the morning, let cook all day while I'm out and about and it's ready for my family to eat at dinner time. The recipes in this cook book do involve a slow cooker but there is a lot of preparation required beforehand and then the food is just in the slow cooker for a short time. I'd say the average was around 3 hours. I think the slow cooker is mainly used as substitute for a simmering pot that you'd have to keep an eye on, not for simplicity. In the beginning, Paniz spends some time explaining how to set up an Indian kitchen including explaining what each spice is and why it's used.

It's very informative and handy. At the beginning of each recipe she give some tidbits about the recipe's origin, how and what it is served with, why her family enjoys it or something else of that nature. That knowledge will make me feel more comfortable ordering something other than my usual the next time I eat at an Indian restaurant. Also, after reading the actual recipes I will know more about what's in the various dishes on the menu. Although this book does offer some great information about Indian cuisine, it's not for a busy person on the go. I would recommend The New Indian Slow Cooker cookbook to experienced home cooks or weekend gourmets who love spending time in the kitchen.

We have made a couple recipes from this book and they have turned out great. I am really enjoying being able to make Indian food in the slow cooker.

Not as good as the original recipe book. Much prettier and I like the spiral binding but the recipes are repeats really and not inspiring.

I already have this book, my daughter really likes my curries etc., so this purchase was for her!

Great for the slow cooker. I work a lot and this makes it easy to have great meals.

Neela Paniz.....oh why oh why did you move away from L.A. and close your wonderful restaurant. I could never get enough of this talented author's wonderful food. Perhaps her cookbooks are the next best thing....and this one is a complete winner! Thank you, Neela...you've done it again.

Most of the recipes contained have been streamlined for the "slow cooker" demographic, making

them more accessible and easier to cook than the "normal" versions of these dishes. Who should buy this: Casual cooks of Indian food who aren't terribly concerned with exact authenticity and Indian food addicts who want easy, authentic-tasting recipes that can be done quickly during the week without having to spend a couple hours cooking something from Neela's other book, the excellent *Bombay Cafe Cookbook*.
