I ordered these books for our volunteer coaches. Great books highly recommend them to help those who want to learn and those who want to teach.

Masterful! Written by a masterful gentlemen.

The author has many years of experience and many championships under his belt to prove that his methods work. The book is written in a very practical, easily understood manner. It gives lots of

great examples and many charts that are useful in developing your own XC program. The book covers every single aspect of XC so there is something for everyone. This book has been very helpful to me - a new XC coach. I highly recommend it.

I have a lot of respect for Joe Newton. This book was published in the late 90s so some advancements have been made that make this publication a little outdated. All the while, good insights into what has made Coach Newton's program as legendary as it is!

I use part of this as what I do with my team. 20years 18 District championships and 8 state trophies.

Nice to have all the history of their cross country team. Good to see these kids getting recognized. Would like to see more science explained in the program. A lot of "do as I tell you" type of training is explained. I guess that works well for teenagers.

Very good book. Has a lot of inside similar to the way I coach.

The book arrived on time in great condition just as the review stated. The book is a great resource for any one who coaches cross country!
