Inspired by her mom who has lived with and battled the disease for 25 years, author Lianna Marie wrote her first book Everything You Need To know About Parkinson's and founded the website AllAboutParkinsons.com. To date, the website has had over one million visitors and the book has been sold in 47 countries worldwide.

My Husband has PSP and I am his caregiver most of the time His illness has left him without a voice and the communication is difficult. But this book was fantastic read it in one day. I could see all the things I was doing wrong. He still wants to be independent and he can do most things but I was smothering him. This book helped me see I was hurting him more than helping. I would recommend any caregiver to read it.Great Job

I was very pleased with the thorough coverage on the topic of caring for Parkinson's patients. The book included helpful and practical advice from someone who has taken this journey herself. Because of careful research by the author it is a valuable reference resource.

Lot's of good information. Guess I didn't say "I love it" because the topic is so hard. I would definitely say "buy it"!

My wife has just been diagnosed with PD and this is the first bit of education about it. I didn't like it at all but I know I will be reading it over and over. I got a sense, especially in the last chapter, that Ms. Marie has been there for her Mom and that she was there for me.

Very good product! The product is exactly as it appeared on the description. It is easy to use and fulfilled my expectations.

Good insight for those caring for family members. A lot of advice packed in this book and also what to expect from those with Parkinson's disease. This book was helpful to me.

I have found this book very informative lots of facts I was not sure of some time it is quite difficult to get answers to problems you worry about I would definitely recommend this book

this is such a good book
