When I was a kid, my Dad and I watched "The Wonderful World of Disney" on TV, every Sunday night. It really was "wonderful", taking us to parts of the world we would never visit in person.. the heart of Africa, the middle of the Gobi desert, the bottom of the River. Now I am a retired teacher and a grandma. I collected as many Disney books as I could find to use in my classroom. I used them to teach 3rd graders to do research projects, or to coax a reluctant reader to become

interested in finding out about a whale shark, or an Australian cassowary. I plan to use "Disney's Learning Wonderful World of Animals" book to fascinate and educate my little grandson, Jonny. At 17 months, he already loves animals and their noises, so the amazing pictures in this book will certainly interest him. He will soon to pointing to each critter and asking, "Dat"?? And I will know most of the answers. Good choice!!

Dr. Moore's enthusiasm and passion for wildlife is present in this book! Each page is filled with little known facts as he answers questions posed by elementary school students. The format is friendly for all ages as you can skip around as you choose which group of animals to learn more about! This book is a must have for all with a love for animals!
