Providing for Your Spouse & Children in a Second Marriage

This book was a godsend. I have read it cover to cover and dogeared the pages, taken notes, written down questions to ask our attorney and more. I was in a fog about our wills and estate. This easy-to-read and down-to-earth book is a MUST for any couple looking to plan the same if either of them have been married before, regardless of their ages.

Terrific clear, simple, well-grounded and helpful book, based on the premise of being fair to everyone (children from earlier marriages as well as new spouses) and expressing values and family obligations in a viable estate plan.

Here's an example of why ebooks get criticized: Unlike the paper book, this version contains helpful forms in the appendix that AREN'T available in a pdf format. This would be a simple fix, but apparently the editor/publisher wants you to buy both. Other ebooks I've bought have provided pdfs of forms at the end. C'mon, NOLO!

Great resource. This book was extremely helpful!

I am a practicing attorney and this book does not really give sufficient details to be of much use. It provides a good start but do not expect all of your questions to be answered. Its a good start, but falls short.

It was very basic. We already new a lot of what was in the book based on general reseaech we did. It did not have anything substantial.

good

very helpful - provides many examples of different scenarios. This book will help you be prepared when you meet the attorney not only with the documentation you need but also with helping you determine what you want done with your estate.
