Start Your Own Real Estate Photography Business

Synopsis

Ever wanted to start your own photography business? Do you enjoy real estate and taking pictures of homes? Are you a real estate agent or broker looking for additional income? Are you already a photographer looking to expand your business? *How to Start Your Own Real Estate Photography Business* was written by Tim Denbo, a professional real estate photographer and owner of a successful international real estate virtual tour business shows you step by step what you need to know to get started. What equipment do you need? How much investment does it take? How much money can you earn? Who and How do you market to real estate agents? Includes email templates, file and folder structure examples, and more secrets, tips and tricks only someone in the business can share. And it's all here in *How to Start Your Own Real Estate Photography Business* to help you get started.

Customer Reviews

I have owned my own business for over twenty years. If your brand new to owning your own

business read everything you can including this book. If you have knowledge of owning your own business I would pass. I didn't learn anything new. I am New to photo business but have owned real estate related business. This is more starting your own business 101.

Clear and concise advice for anyone interested in this field. This book is filled with specific recommendations for equipment, camera settings and other technical aspects of this type of photography.

I am in the early stages of starting my own RE photography business and I found this book to be very helpful and straight to the point

Think of this book as an abridged summary of what you need to consider if you're thinking of starting up a photo business. Glad I read it.

I feel bad about giving this review but at the same time it needs to be written so that nobody else wastes their hard earned money on this e-book. The only info that was found to be useful was learning a bit (very little) about virtual tours which I didn't know about. With that said, I can not figure out who this book would benefit.. If you're a photographer* then there is nothing new in this for you. If you're an agent then there is also nothing for you to learn as the author states right at the beginning that this is not a learn to shoot book. *When I say "Photographer" I mean a person with more than Instagram and an iPhone or a rich person who can afford a high end camera but does nothing but snap photographs with the camera set to "Auto". A real photographer knows what depth of field is and what an aperture is and how to change your f-stop. A real photographer can set his white balance and can tell you what "noise" is. A true photographer can fill in the missing word in this sentence (Chromatic _____ happens when using cheap lenses). The only way this "book" had a chance at being somewhat worth the cost, would have been if they included an appendix of important sites, agencies, associations, etc pertaining to the real estate world but it doesn't. Please skip this purchase and probably any other "how to" books from this author.

This book incorporates bits about real estate, photography, marketing, and business philosophy in an easily digested format. And the price is so right. Thanks for writing, Mr. Denton.

Book was a good start to starting a business in the field but left a lot to be desired. Still, overall, a

good basic how to.

As the title says, contains a lot of good solid, no nonsense info regarding starting up and running a virtual tour business. It is not a long, lengthy tome, but rather short, punch and to the point. Good value for money
