Great

I love this book because the author, CLEARLY, explains how you shouldn't be misled by Real Estate gurus who try to tell you Land Trusts provide bullet proof protection: they don't. Only an irrevocable trust does.

This is one of the best books guiding you in a very balanced way on what you need to know about asset management. I liked it because it gave me the real scoop that no one wants to tell you no matter the topic. I would read every book written by Mark. He helps with options based on where you are at.

Mark Kohler brings light on the subject of asset protection. All CPA's should be reading this book to get them to an understanding beyond what they learned in school to position themselves to be a true advisor to their clients. It will change your views on how to purchase, manage, and exit out of "all" assets an individual, family, or business acquire.

Incredibly average. If you didn't already know that lawyers I feel sorry for you.

Excellent insight into finding true security with ones life. I would strongly recommend this book to anyone who is looking to find the "American Dream"

Yes, some lawyers are liars (full disclosure: I am a lawyer), but so are people in other professions (e.g., doctors, architects, teachers, etc.). On top of that, people described in the book that may fit the description are not necessarily even lawyers but who are in the business of selling asset

protection packages. Additionally, author states that one should be careful with such people and if they are unsure to consult with a lawyer or other specialists, which is just common sense.

Learned a lot from this book and would recommend it.
