Theory Of Unimolecular And Recombination Reactions (Physical Chemistry Texts)

Synopsis

This is a textbook for senior undergraduate and research students and a working reference for professionals in this field. The book shows how rules of gas-phase unimolecular and recombinant reactions can be calculated from first principles, and how these modern methods can be used to interpret, fit and understand experimental data. Applications of the methods given in the text include modelling of aerochemical and combustion processes. The book covers the fundamentals and applications of transition state and RRKM theory, of collisional energy transfer, and of the master equation. Extensive worked examples covering all aspects of the field are included.

Book Information

Series: Physical Chemistry Texts

Hardcover: 368 pages

Publisher: Blackwell Science Inc (September 1990)

Language: English

ISBN-10: 0632027495

ISBN-13: 978-0632027491

Shipping Weight: 2 pounds

Average Customer Review: 4.0 out of 5 stars 1 customer review

Best Sellers Rank: #900,953 in Books (See Top 100 in Books) #9 in [Books > Science & Math > Chemistry > Organic > Reactions](#) #306 in [Books > Science & Math > Chemistry > Physical & Theoretical > Physical Chemistry](#) #2860 in [Books > Textbooks > Science & Mathematics > Chemistry](#)

Customer Reviews

love it . my parents need it, OK, there is do not have any problem. the most professional service. Quality product, thick enough not to bend with a solid, comfortable grip. Couldn't ask for a better product for the price.
