Just received the book today and oh my gosh, I find that I cannot put it down! The book is so much more than a cookbook, it is a wealth of information which will no doubt help a lot of people, especially those that are just starting out on this journey. It actually explains the science behind this way of eating, and includes a meal plan which will be especially helpful to those of us that sometimes get overwhelmed. The food (pictures) look absolutely yummy, and one glance at the recipe reassured me that I could replicate it. The recipes are well explained, and some of them even have URLs listed for videos that accompany them. The recipes each have icons that are extremely helpful, one glance can tell me if the recipe is egg free, nut free, dairy free, vegetarian, can be made in a slow cooker, can be made in one pot, or has a single serving option. Since I am the only member in my family that is currently following this diet, the single serving option will be especially useful for me. When this book arrived, my husband rolled his eyes at me and asked "...another cookbook?". He then picked it up to skim through and almost immediately said "oooh, we'll have to try that chimichurri chicken!". For the record, this is my very first ketogenic specific cookbook and I loved it so much that I came back online and ordered the kindle version for my best friend. Well done, Maria...absolutely well done! Update: I've had this book for almost a week now, the recipes are FANTASTIC. I just made (and ate) the Key lime Fat Bomb (pg 340), ...it was absolutely spot on!!!! 98 calories, 9.4g fat, 0.3g carbs, 3.3g protein. (plus a bit of cream on it that I added). It TASTES absolutely sinful!

I follow a strict 15g carb a day 'diet' so I can't use a lot of these but if you're doing a 30-50 then it'd be great for you

I received my (full-price) copy yesterday, and I am halfway through it already. I have other books by Maria Emmerich, and they are all good, but this is her best by far. I'm NOT a good cook - in fact I

dislike it - but these recipes are simple, only require a few ingredients and FAST. I came to the recipe for Cheese Puffs and ran into the kitchen and cooked a few for a quick snack. 45 seconds later, done and done! Yummy. As a Type II diabetic, I *must* eat Keto if I am to keep my feet, so I truly appreciate all the effort that goes into creating these recipes - recipes that I can share with family and friends and not apologize for depriving them for my sake! Delicious.

I had mild expectations when I purchased this book. In my mind at the time it was another cook book. Once I opened the package, I was floored. 1: The volume of recipes in this book is awesome. Once you get through the intro and "tutorials" you have a beefy 252 pages of recipes! Everything from sauces to desserts and everything in between. 2: Vibrant pictures. This is common among cook books but just about everything has a picture. 3: Ease of instruction. It's worth noting that the "tutorials" and information in the beginning of the book is worth the time. Do you have to read it to make something, certainly not. Yet, it will make things easier as you navigate through the tome and create the dishes. A word of caution on 2 fronts. 1: Take your time with these recipes and follow the adjustments to the letter for ingredients that are substitutes for common items (ie: you will use MUCH less Stevia than sugar as a sweetener). 2: Research on which type of Keto based diet you wish to follow. The 2 I recommend looking into are: The Carb Night Solution by John Kiefer and The Anabolic Solution by Dr. Mauro Di Pasquale. Both books are keto based diets, with a small variance between them. Happy eating!

This is a well done cookbook!!! I'm a Registered Nurse. I'm super interested in nutrition and healing the body from exercise and nutrition. Ketogenic lifestyle makes so much sense from a health and lifestyle outlook. I have followed a ketogenic lifestyle and feel absolutely amazing being "Keto Adapted" (another great book of hers). Just got the book yesterday and I LOVE the grocery list, suggested pantry items, kitchen gadgets, and tips to simplify KETO life. I'm on chapter 4 and I'm loving it so much. She has a 7 day weight loss and healing plan. Then a 30 day maintenance and healing plan. Super user friendly! She has rationales of uses and best sweeteners, spices, sauces, etc. Amazing pictures and walk throughs. Lots of sauces to make. Food doesn't have to be dry with her recipes and way of eating! The thing I'm most super excited about is the section about smoking foods. The BBQ and rubs and sauces have been an issue because of the high sugar content. She has done the hard work of testing until she finds a recipe that tastes amazing. This book exceeded my expectations. Seriously worth every penny.

This book is so great for beginners and experience Keto dieters alike. I love the intro that explains all that you really need to know, including "sugar" conversions making this simple. There are alternatives for many ingredients throughout the book to help you easily customize the recipes. The estimated time to prep and cook these are actually pretty accurate and the instructions are thorough. I have recommended it to anyone who has talked to me about Keto. All of the food I have tried is delicious. The only thing I'd like to see as far as revisions would be less ice cream type of desserts and more cakes or pies. I just look online for desserts instead and use this book for if I have questions for substitutions.

I found some great recipes and utilized them for some enjoyable dieting. Losing weight and eating good food is a great way to lose weight, this cookbook, provides that. The colored photos are very helpful in the process of cooking and determining the outcome and appearance of the prepared food.
