# Balance Math & More! Level 3

## **Synopsis**

This fun, mind-building 48-page book is made up of three types of puzzles that focus on addition and subtraction of whole numbers. These puzzles also sharpen students' critical thinking, computational, and algebraic reasoning skills. 1. Balance Math Puzzles require students to analyze balances to deduce the missing value. 2. Inside-Out Math Puzzles require students to reverse their thinking, using the inverse relationships between addition and subtraction and multiplication and division to solve the puzzle. 3. Tic Tac Math Puzzles require students to figure out the correct order to complete all rows, columns, and diagonals. This book's spiraling difficulty is designed to scaffold a student's conceptual understanding of the targeted operations. Teaching suggestions and detailed solutions are included in each book. Try one of these intriguing puzzles—*and then try to stop!*

## **Book Information**

Series: Balance Math and More! (Book 3)

Paperback: 48 pages

Publisher: The Critical Thinking Co (2010)

Language: English

ISBN-10: 1601442785

ISBN-13: 978-1601442789

Package Dimensions: 10.7 x 8.5 x 0.3 inches

Shipping Weight: 6.4 ounces

Average Customer Review: 3.8 out of 5 stars 4 customer reviews

Best Sellers Rank: #340,889 in Books (See Top 100 in Books) #55 in Books > Children's Books > Education & Reference > Math > Algebra

Tic Tac Math Puzzles require students to figure out the correct order to complete all rows, columns, and diagonals. This book's spiraling difficulty is designed to scaffold a student's conceptual

understanding of the targeted operations. Teaching suggestions and detailed solutions are included in each book. Try one of these intriguing puzzles— and then try to stop!

I use these with my student who know their multiplication and division facts inside out. It's a great way to challenge them and extend their thinking beyond rote facts. I love how they get more challenging as you progress in the book-built in differentiation! Love these! The kids scream for 'more algebra'! For the record, I teach THIRD GRADE!

Perfect for my 4th and 5th grade gifted and talented students to work at their own pace. I'm using it in conjunction with Hands on Algebra and the students are really understanding the concepts of balancing both sides of an equation by substituting, replacing (subtracting), and dividing.

Good challenging problems for kids

Very limited questions. I was expecting a lot.
